Summary

I'm Subikshan, a 3rd-year CS student at National Engineering College, Kovilpatti. I chose CS because I've always enjoyed building things — scored a centum in the subject at school and never looked back. I'm organised, dependable, and work best in teams that communicate openly. Outside academics, I enjoy competitive coding, badminton, and keeping up with the latest in tech. Long-term goal: Senior Engineer at a strong product company.

Education

National Engineering College, Kovilpatti

B.E Computer Science & Engineering

2023 – 2027

8.01 / 10 CGPA

Belfield Matriculation School, Asaripallam

2021 – 2022

12th Grade (Maths-Computer) – 87% | 10th Grade – 84%

Work Experience

Brainwave Matrix Solutions

Jun 2025 – Jul 2025

UI/UX Design Intern

Remote

- Built end-to-end wireframes, user flows, and high-fidelity prototypes in Figma for 3 live client products, improving overall usability scores.
- Used design-thinking methods to rework user journeys; created micro-interactions and animations that lifted stakeholder engagement by 30%.

Edu-Tantur

Mar 2025 – May 2025

Frontend Development Intern

Remote

- Developed responsive React.js UI components and maintained version control via GitHub, cutting feature delivery time and reducing bug count by 40%.

Codsoft

Mar 2025 – Apr 2025

Web Development Intern

Remote

- Built responsive web pages using HTML, CSS, JavaScript and React; set up Git branching workflows that made the codebase easier to maintain and review.

Projects

Complaint Escalation & Resolution System | React 18 · Node.js · Express.js · MongoDB · Razorpay

[github/subiks-xh](https://github.com/subiks-xh)

- Built an enterprise grievance platform with JWT auth, role-based access, and an AI-powered staff-assignment engine that cut resolution time by 50%.
- Wired up Razorpay payments, SLA-driven cron escalation, live notifications, and multi-tenant org management into a single cohesive system.

Laboratory Management System (LabMS) | React · Node.js · MySQL · JWT · AI

[github/Lab-Stock-Mgmt](https://github.com/Lab-Stock-Mgmt)

- Developed a full-stack lab portal with role-based access, bulk data import, and AI query support; live dashboards reduced manual reporting by 60%.

Smart Library Automation System | React · Node.js · MySQL · RFID · BLE Beacons

[github/Library-Mgmt](https://github.com/Library-Mgmt)

- Integrated RFID shelf tracking and BLE indoor navigation so students can locate books step by step; GPS + Wi-Fi + motion sensors handle entry automatically, cutting manual tracking by 80%.

Technical Skills

Languages: C, C++, JavaScript

Backend: Node.js, Express.js, Flask

Frontend: React, HTML, CSS, TailwindCSS, Bootstrap

Databases: MySQL, MongoDB, Firebase Firestore

AI & Data: Generative AI, RAG Pipelines

Cloud & Tools: AWS, GitHub, Postman, Figma, Cloudinary

Mobile: Flutter

Honours And Awards

Graph Theory Programming Camp – AlgoUniversity

2024

Mentored by Codeforces Master, Manas Kumar Verma

- Took part in the Graph Theory Programming Camp at AlgoUniversity under Codeforces Master Manas Kumar Verma; solved 17 advanced graph problems covering shortest-path algorithms and complex traversal techniques.

Gen AI for Business Innovation – IIT Mandi iHub & HCI Foundation

Feb – Mar 2026

Certificate of Completion – National Engineering College

- Finished the "Gen AI for Business Innovation" course run by IIT Mandi iHub & HCI Foundation at NEC (11 Feb – 17 Mar 2026); gained hands-on skills in Generative AI tools, prompt engineering, and real-world business use cases.

Smart India Hackathon 2025 – College-Level Finalist

2025

Government of India National Hackathon – Internal Selection Round

- Made it to the college-level finals of SIH 2025; put together a working prototype that was reviewed by faculty and industry mentors during the internal selection round.

AWS Certifications – Amazon Web Services via Coursera

Nov – Dec 2023

Authorized by Amazon Web Services

- Cleared AWS Cloud Technical Essentials (Nov 2023) and AWS Fundamentals: Addressing Security Risk (Dec 2023); built solid understanding of IAM, cloud infrastructure, and security best practices.

MongoDB Certified Developer

2024

MongoDB University

- Passed the MongoDB developer certification; demonstrated strong knowledge of aggregation pipelines, indexing, schema design, and query tuning for production workloads.

Co-Curricular Achievements

- Completed the GeeksforGeeks Full-Stack Dev Bootcamp and GUVI UI/UX Design course; put the skills to use across 5+ real projects.
- Attended an App Development Workshop (Flutter) at Edu-Tantur and shipped a working cross-platform mobile prototype by the end of it.
